PROCEDURE:

- Step1: Develop a node red application for GPS
- Step2: Develop a python code for GPS
- Step3: Run the program
- Step4: Train location will be displayed
- Step5: Create a node red for wakeup call and E-catering service

NODE RED FLOW:

PYTHON CODE OUTPUT:

A screenshot of the IDLE Shell 3.9.6 window. The window has a menu bar with 'File', 'Edit', 'Shell', 'Debug', 'Options', 'Window', and 'Help'. The main text area displays the output of a Python script, showing multiple instances of 'Published data Successfully: %s {'name': 'Train1', 'lat': ..., 'lon': ...}' followed by a closing brace. The data points are repeated, with some variations in latitude and longitude values. The window title is '*IDLE Shell 3.9.6*'. The taskbar at the bottom shows various application icons and the system clock indicating 'ENG IN'.
